MRPS24 Antibody (Center) Blocking Peptide

Synthetic peptide
Catalog # BP10497c

Specification

MRPS24 Antibody (Center) Blocking Peptide - Product Information

Primary Accession	Q96EL2
Other Accession	NP_114403.1

MRPS24 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 64951

Other Names
28S ribosomal protein S24, mitochondrial, MRP-S24, S24mt, bMRP-47, bMRP47, MRPS24

Format
Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions
This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MRPS24 Antibody (Center) Blocking Peptide - Protein Information

Name MRPS24

Cellular Location
Mitochondrion.

MRPS24 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Blocking Peptides

MRPS24 Antibody (Center) Blocking Peptide - Background

Mammalian mitochondrial ribosomal proteins are encoded bynuclear genes and help in protein synthesis within themitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of asmall 28S subunit and a large 39S subunit. They have an estimated75% protein to rRNA composition compared to prokaryotic ribosomes,where this ratio is reversed. Another difference between

mammalianmitoribosomes and prokaryotic ribosomes is that the latter containa 5S rRNA. Among different species, the proteins comprising themitoribosome differ greatly in sequence, and sometimes inbiochemical properties, which prevents easy recognition by sequencehomology. MRPS24 encodes a 28S subunit protein. A pseudogenecorresponding to this gene is found on chromosome 11. [provided byRefSeq].
