

# USP21 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP1069a

## Specification

## USP21 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

<u>Q9UK80</u>

## USP21 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 27005

**Other Names** 

Ubiquitin carboxyl-terminal hydrolase 21, Deubiquitinating enzyme 21, Ubiquitin thioesterase 21, Ubiquitin-specific-processing protease 21, USP21, USP23

## Target/Specificity

The synthetic peptide sequence used to generate the antibody <a

href=/product/products/AP1069a>AP1069a</a> was selected from the N-term region of human USP21. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

#### Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions** This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## USP21 Antibody (N-term) Blocking Peptide - Protein Information

## Name USP21 {ECO:0000303|PubMed:10799498, ECO:0000312|HGNC:HGNC:12620}

## Function

Deubiquitinates histone H2A, a specific tag for epigenetic transcriptional repression, thereby acting as a coactivator (By similarity). Deubiquitination of histone H2A releaves the repression of di- and trimethylation of histone H3 at 'Lys-4', resulting in regulation of transcriptional initiation (By similarity). Regulates gene expression via histone H2A deubiquitination (By similarity). Deubiquitinates BAZ2A/TIP5 leading to its stabilization (PubMed:<a

href="http://www.uniprot.org/citations/26100909" target="\_blank">26100909</a>). Also capable of removing NEDD8 from NEDD8 conjugates but has no effect on Sentrin-1 conjugates (PubMed:<a href="http://www.uniprot.org/citations/10799498" target="\_blank">10799498</a>). Also acts as a negative regulator of the ribosome quality control (RQC) by mediating deubiquitination of 40S ribosomal proteins RPS10/eS10 and RPS20/uS10, thereby antagonizing ZNF598-mediated 40S ubiquitination (PubMed:<a href="http://www.uniprot.org/citations/32011234"

target="\_blank">32011234</a>).

Cellular Location Cytoplasm. Nucleus

**Tissue Location** 

Highly expressed in heart, pancreas and skeletal muscle. Also expressed in brain, placenta, liver and kidney, and at very low level in lung.

## USP21 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

## USP21 Antibody (N-term) Blocking Peptide - Background

USP21 is a ubiquitin-specific protease, an enzyme that removes ubiquitin from ubiquitinated proteins. The encoded protein belongs to the C19 peptidase family, also known as family 2 of ubiquitin carboxyl-terminal hydrolases. This protein has been reported to be capable of removing NEDD8 from NEDD8 conjugates. Alternatively spliced transcript variants encoding different isoforms have been identified.
