

GNA14 Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP10721b

Specification

GNA14 Antibody (C-term) Blocking peptide - Product Information

Primary Accession

095837

GNA14 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 9630

Other Names

Guanine nucleotide-binding protein subunit alpha-14, G alpha-14, G-protein subunit alpha-14, GNA14

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GNA14 Antibody (C-term) Blocking peptide - Protein Information

Name GNA14

Function

Guanine nucleotide-binding proteins (G proteins) are involved as modulators or transducers in various transmembrane signaling systems.

GNA14 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

GNA14 Antibody (C-term) Blocking peptide - Background

This gene encodes a member of the guaninenucleotide-binding, or G protein family. G proteins areheterotrimers consisting of alpha, beta and gamma subunits. Theencoded protein is a member of the alpha family of G proteins, morespecifically the alpha q subfamily of G proteins. The

Tel: 858.875.1900 Fax: 858.875.1999

encodedprotein may play a role in pertussis-toxin resistant activation ofphospholipase C-beta and its downstream effectors.
