

Catalog # BP1076b

GNMT Antibody (C-term) Blocking Peptide Synthetic peptide

Specification

GNMT Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

<u>Q14749</u>

GNMT Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 27232

Other Names Glycine N-methyltransferase, GNMT

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP1076b was selected from the C-term region of human GNMT. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GNMT Antibody (C-term) Blocking Peptide - Protein Information

Name GNMT (<u>HGNC:4415</u>)

Function

Catalyzes the methylation of glycine by using S- adenosylmethionine (AdoMet) to form N-methylglycine (sarcosine) with the concomitant production of S-adenosylhomocysteine (AdoHcy), a reaction regulated by the binding of 5-methyltetrahydrofolate. Plays an important role in the regulation of methyl group metabolism by regulating the ratio between S-adenosyl-L-methionine and S-adenosyl-L- homocysteine.

Cellular Location Cytoplasm {ECO:0000250|UniProtKB:P13255}.

Tissue Location Expressed only in liver, pancreas, and prostate.

GNMT Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

GNMT Antibody (C-term) Blocking Peptide - Background

Glycine N-methyltransferase catalyzes the synthesis of N-methylglycine (sarcosine) from glycine using S-adenosylmethionine (AdoMet) as the methyl donor. GNMT acts as an enzyme to regulate the ratio of S-adenosylmethionine to S-adenosylhomocysteine (AdoHcy) and participates in the detoxification pathway in liver cells.
