

TNFSF4 Antibody (Center) Blocking peptide
Synthetic peptide
Catalog # BP11076c**Specification**

TNFSF4 Antibody (Center) Blocking peptide - Product Information

Primary Accession [P23510](#)

TNFSF4 Antibody (Center) Blocking peptide - Additional Information

Gene ID 7292

Other Names

Tumor necrosis factor ligand superfamily member 4, Glycoprotein Gp34, OX40 ligand, OX40L, TAX transcriptionally-activated glycoprotein 1, CD252, TNFSF4, TXGP1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TNFSF4 Antibody (Center) Blocking peptide - Protein Information

Name TNFSF4

Synonyms TXGP1

Function

Cytokine that binds to TNFRSF4. Co-stimulates T-cell proliferation and cytokine production.

Cellular Location

Membrane; Single-pass type II membrane protein.

TNFSF4 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

TNFSF4 Antibody (Center) Blocking peptide - Background

The protein encoded by this gene is a cytokine that belongs to the tumor necrosis factor (TNF) ligand family. This cytokine is a ligand for receptor TNFRSF4/OX4. It is found to be involved in T cell antigen-presenting cell (APC) interactions. In surface Ig- and CD40-stimulated B cells, this cytokine along with CD70 has been shown to provide CD28-independent costimulatory signals to T cells. This protein and its receptor are reported to directly mediate adhesion of activated T cells to vascular endothelial cells.
