

# **NUMB Antibody (N-term) Blocking peptide**

Synthetic peptide Catalog # BP11449a

### **Specification**

### NUMB Antibody (N-term) Blocking peptide - Product Information

Primary Accession P49757

### NUMB Antibody (N-term) Blocking peptide - Additional Information

**Gene ID 8650** 

#### **Other Names**

Protein numb homolog, h-Numb, Protein S171, NUMB

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

## **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### NUMB Antibody (N-term) Blocking peptide - Protein Information

Name NUMB (HGNC:8060)

#### **Function**

Regulates clathrin-mediated receptor endocytosis (PubMed: <a

href="http://www.uniprot.org/citations/18657069" target="\_blank">18657069</a>). Plays a role in the process of neurogenesis (By similarity). Required throughout embryonic neurogenesis to maintain neural progenitor cells, also called radial glial cells (RGCs), by allowing their daughter cells to choose progenitor over neuronal cell fate (By similarity). Not required for the proliferation of neural progenitor cells before the onset of neurogenesis. Also involved postnatally in the subventricular zone (SVZ) neurogenesis by regulating SVZ neuroblasts survival and ependymal wall integrity (By similarity). May also mediate local repair of brain ventricular wall damage (By similarity).

#### **Cellular Location**

Cell membrane; Peripheral membrane protein; Cytoplasmic side. Endosome membrane; Peripheral membrane protein; Cytoplasmic side. Note=Localizes to perinuclear endosomes in an AAK1-dependent manner.

## NUMB Antibody (N-term) Blocking peptide - Protocols

Tel: 858.875.1900 Fax: 858.875.1999

Provided below are standard protocols that you may find useful for product applications.

## NUMB Antibody (N-term) Blocking peptide - Background

The protein encoded by this gene plays a role in the determination of cell fates during development. The encodedprotein, whose degradation is induced in a proteasome-dependentmanner by MDM2, is a membrane-bound protein that has been shown toassociate with EPS15, LNX1, and NOTCH1. Four transcript variantsencoding different isoforms have been found for this gene.
