

LSM7 Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP11679b

Specification

LSM7 Antibody (C-term) Blocking peptide - Product Information

Primary Accession

Q9UK45

LSM7 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 51690

Other Names

U6 snRNA-associated Sm-like protein LSm7, LSM7

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

LSM7 Antibody (C-term) Blocking peptide - Protein Information

Name LSM7

Function

Plays a role in pre-mRNA splicing as component of the U4/U6- U5 tri-snRNP complex that is involved in spliceosome assembly, and as component of the precatalytic spliceosome (spliceosome B complex) (PubMed:28781166). The heptameric LSM2-8 complex binds specifically to the 3'-terminal U-tract of U6 snRNA (PubMed:10523320).

Cellular Location

Nucleus

LSM7 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

LSM7 Antibody (C-term) Blocking peptide - Background

This gene encodes a member of the bicoid sub-family ofhomeodomain-containing transcription factors. The encoded proteinacts as a transcription factor and may play a role in brain andsensory organ development. A similar protein in mice is requiredfor proper forebrain development. Two transcript variants encoding distinct isoforms have been identified for this gene. Otheralternative splice variants may exist, but their full lengthsequences have not been determined.
