

ZNF384 Antibody (C-term) Blocking peptide Synthetic peptide Catalog # BP11944b

## Specification

# ZNF384 Antibody (C-term) Blocking peptide - Product Information

Primary Accession

<u>Q8TF68</u>

## ZNF384 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 171017

**Other Names** 

Zinc finger protein 384, CAG repeat protein 1, CAS-interacting zinc finger protein, Nuclear matrix transcription factor 4, Nuclear matrix protein 4, Trinucleotide repeat-containing gene 1 protein, ZNF384, CAGH1, CIZ, NMP4, TNRC1

#### Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage** Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions** 

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# ZNF384 Antibody (C-term) Blocking peptide - Protein Information

Name ZNF384

Synonyms CAGH1, CIZ, NMP4, TNRC1

Function

Transcription factor that binds the consensus DNA sequence [GC]AAAAA. Seems to bind and regulate the promoters of MMP1, MMP3, MMP7 and COL1A1 (By similarity).

Cellular Location Nucleus.

## ZNF384 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

# ZNF384 Antibody (C-term) Blocking peptide - Background

This gene contains long CAG trinucleotide repeats codingconsecutive glutamine residues. The gene product may functions as atranscription factor, with a potential role in the regulation ofneurodevelopment or neuroplasticity. The protein appears to bindand regulate the promoters of MMP1, MMP3, MMP7 and COL1A1. Studiesin mouse suggest that nuclear matrix transcription factors(NP/NMP4) may be part of a general mechanical pathway that couplescell construction and function during extracellular matrixremodeling. Multiple transcript variants encoding several isoformshave been found for this gene.
