

## JAG1 Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP12146b

# **Specification**

## JAG1 Antibody (C-term) Blocking peptide - Product Information

**Primary Accession** 

P78504

## JAG1 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 182

#### **Other Names**

Protein jagged-1, Jagged1, hJ1, CD339, JAG1, JAGL1

### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### JAG1 Antibody (C-term) Blocking peptide - Protein Information

Name JAG1

Synonyms JAGL1

### **Function**

Ligand for multiple Notch receptors and involved in the mediation of Notch signaling (PubMed:<a href="http://www.uniprot.org/citations/18660822" target="\_blank">18660822</a>, PubMed:<a href="http://www.uniprot.org/citations/20437614" target="\_blank">20437614</a>). May be involved in cell-fate decisions during hematopoiesis (PubMed:<a

href="http://www.uniprot.org/citations/9462510" target="\_blank">9462510</a>). Seems to be involved in early and late stages of mammalian cardiovascular development. Inhibits myoblast differentiation (By similarity). Enhances fibroblast growth factor-induced angiogenesis (in vitro).

#### **Cellular Location**

Membrane; Single-pass type I membrane protein. Cell membrane

### **Tissue Location**

Widely expressed in adult and fetal tissues. In cervix epithelium expressed in undifferentiated subcolumnar reserve cells and squamous metaplasia. Expression is up-regulated in cervical squamous cell carcinoma. Expressed in bone marrow cell line HS-27a which supports the long-term maintenance of immature progenitor cells

JAG1 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

JAG1 Antibody (C-term) Blocking peptide - Background

The jagged 1 protein encoded by JAG1 is the human homologof the Drosophilia jagged protein. Human jagged 1 is the ligandfor the receptor notch 1, the latter a human homolog of the Drosophilia jagged receptor notch. Mutations that alter the jagged1 protein cause Alagille syndrome. Jagged 1 signalling throughnotch 1 has also been shown to play a role in hematopoiesis.
