

# OR1L1 Antibody (N-term) Blocking peptide

Synthetic peptide Catalog # BP12216a

### Specification

## **OR1L1 Antibody (N-term) Blocking peptide - Product Information**

Primary Accession

#### <u>Q8NH94</u>

### **OR1L1** Antibody (N-term) Blocking peptide - Additional Information

Gene ID 26737

Other Names Olfactory receptor 1L1, Olfactory receptor 1L2, Olfactory receptor 9-C, OR9-C, Olfactory receptor OR9-27, OR1L1, OR1L2

#### Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage** Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions** This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### **OR1L1** Antibody (N-term) Blocking peptide - Protein Information

Name OR1L1

Synonyms OR1L2

Function Odorant receptor.

**Cellular Location** Cell membrane; Multi-pass membrane protein.

### **OR1L1 Antibody (N-term) Blocking peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

<u>Blocking Peptides</u>

**OR1L1** Antibody (N-term) Blocking peptide - Background

Olfactory receptors interact with odorant molecules in thenose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a largefamily of G-protein-coupled receptors (GPCR) arising from singlecoding-exon genes. Olfactory receptors share a 7-transmembranedomain structure with many neurotransmitter and hormone receptorsand are responsible for the recognition and G protein-mediatedtransduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to theolfactory receptor genes and proteins for this organism isindependent of other organisms.
