## ND3 Antibody (N-term) Blocking peptide <br> Synthetic peptide <br> Catalog \# BP12310a

## Specification

ND3 Antibody (N-term) Blocking peptide - Product Information

Primary Accession
Other Accession

P03897
YP 003024033.1

ND3 Antibody (N-term) Blocking peptide - Additional Information

Gene ID 4537
Other Names
NADH-ubiquinone oxidoreductase chain 3, NADH dehydrogenase subunit 3, MT-ND3, MTND3, NADH3, ND3

Format
Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at $2-8^{\circ} \mathrm{C}$ for up to 6 months. For long term storage store at $-20^{\circ} \mathrm{C}$.
Precautions
This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ND3 Antibody (N-term) Blocking peptide - Protein Information

Name MT-ND3 (HGNC:7458)
Synonyms MTND3, NADH3, ND3

## Function

Core subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I) which catalyzes electron transfer from NADH through the respiratory chain, using ubiquinone as an electron acceptor (PubMed:<a href="http://www.uniprot.org/citations/25118196" target="_blank">25118196</a>). Essential for the catalytic activity of complex I (PubMed:<a href="http://www.uniprot.org/citations/25118196" target="_blank">25118196</a>).

## Cellular Location

Mitochondrion inner membrane \{ECO:0000250|UniProtKB:P03898\}; Multi-pass membrane protein

## ND3 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

## ND3 Antibody (N-term) Blocking peptide - Background

Core subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase (Complex I) that is believed to belong to the minimal assembly required for catalysis. Complex I functions in the transfer of electrons from NADH to the respiratory chain. The immediate electron acceptor for the enzyme is believed to be ubiquinone (By similarity).
