

## IGSF8 Antibody (Center) Blocking peptide

Synthetic peptide Catalog # BP12389c

## **Specification**

## IGSF8 Antibody (Center) Blocking peptide - Product Information

**Primary Accession** 

**Q969P0** 

## IGSF8 Antibody (Center) Blocking peptide - Additional Information

**Gene ID 93185** 

#### **Other Names**

Immunoglobulin superfamily member 8, IgSF8, CD81 partner 3, Glu-Trp-Ile EWI motif-containing protein 2, EWI-2, Keratinocytes-associated transmembrane protein 4, KCT-4, LIR-D1, Prostaglandin regulatory-like protein, PGRL, CD316, IGSF8, CD81P3, EWI2, KCT4

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## IGSF8 Antibody (Center) Blocking peptide - Protein Information

Name IGSF8

Synonyms CD81P3, EWI2, KCT4

### **Function**

May play a key role in diverse functions ascribed to CD81 and CD9 such as oocytes fertilization or hepatitis C virus function. May regulate proliferation and differentiation of keratinocytes. May be a negative regulator of cell motility: suppresses T-cell mobility coordinately with CD81, associates with CD82 to suppress prostate cancer cell migration, regulates epidermoid cell reaggregation and motility on laminin-5 with CD9 and CD81 as key linkers. May also play a role on integrin-dependent morphology and motility functions. May participate in the regulation of neurite outgrowth and maintenance of the neural network in the adult brain.

#### **Cellular Location**

Cell membrane; Single-pass membrane protein

### **Tissue Location**

Expressed in brain, kidney, testis, liver and placenta with moderate expression in all other tissues. Detected on a majority of B-cells, T-cells, and natural killer cells but not on monocytes, polynuclear

cells and platelets

## IGSF8 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
