

MED22 Antibody (N-term) Blocking peptide Synthetic peptide

Catalog # BP12666a

Specification

MED22 Antibody (N-term) Blocking peptide - Product Information

Primary Accession

<u>Q15528</u>

MED22 Antibody (N-term) Blocking peptide - Additional Information

Gene ID 6837

Other Names

Mediator of RNA polymerase II transcription subunit 22, Mediator complex subunit 22, Surfeit locus protein 5, Surf-5, MED22, SURF5

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MED22 Antibody (N-term) Blocking peptide - Protein Information

Name MED22

Synonyms SURF5

Function

Component of the Mediator complex, a coactivator involved in the regulated transcription of nearly all RNA polymerase II-dependent genes. Mediator functions as a bridge to convey information from gene- specific regulatory proteins to the basal RNA polymerase II transcription machinery. Mediator is recruited to promoters by direct interactions with regulatory proteins and serves as a scaffold for the assembly of a functional preinitiation complex with RNA polymerase II and the general transcription factors.

Cellular Location Nucleus.

MED22 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

MED22 Antibody (N-term) Blocking peptide - Background

This gene is located in the surfeit gene cluster, a groupof very tightly linked housekeeping genes that do not sharesequence similarity. The gene is oriented in a head-to-head fashionwith RPL7A (SURF3) and the two genes share a bidirectionalpromoter. The encoded proteins are localized to the cytoplasm. Twoalternative transcript variants encoding different isoforms havebeen identified for this gene.
