

**SLC13A2 Antibody (N-term) Blocking peptide**  
**Synthetic peptide**  
**Catalog # BP12824a****Specification**

---

**SLC13A2 Antibody (N-term) Blocking peptide - Product Information**Primary Accession [Q13183](#)**SLC13A2 Antibody (N-term) Blocking peptide - Additional Information****Gene ID** 9058**Other Names**

Solute carrier family 13 member 2, Na(+)/dicarboxylate cotransporter 1, NaDC-1, Renal sodium/dicarboxylate cotransporter, SLC13A2, NADC1, SDCT1

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**SLC13A2 Antibody (N-term) Blocking peptide - Protein Information****Name** SLC13A2**Synonyms** NADC1, SDCT1**Function**

Low-affinity sodium-dicarboxylate cotransporter, that mediates the entry of citric acid cycle intermediates, such as succinate, citrate, fumarate and alpha-ketoglutarate (2-oxoglutarate) into the small intestine and renal proximal tubule (PubMed:<a href="http://www.uniprot.org/citations/10894787" target="\_blank">10894787</a>, PubMed:<a href="http://www.uniprot.org/citations/9668069" target="\_blank">9668069</a>, PubMed:<a href="http://www.uniprot.org/citations/8967342" target="\_blank">8967342</a>). Transports the dicarboxylate into the cell with a probable stoichiometry of 3 Na(+) for 1 divalent dicarboxylate, rendering the process electrogenic (PubMed:<a href="http://www.uniprot.org/citations/8967342" target="\_blank">8967342</a>, PubMed:<a href="http://www.uniprot.org/citations/9668069" target="\_blank">9668069</a>, PubMed:<a href="http://www.uniprot.org/citations/10894787" target="\_blank">10894787</a>). Citrate is transported in protonated form as a divalent anion, rather than the trivalent form which is normally found in blood (PubMed:<a href="http://www.uniprot.org/citations/10894787" target="\_blank">10894787</a>). Has a critical role in renal dicarboxylate transport (By similarity).

**Cellular Location**

Apical cell membrane; Multi-pass membrane protein

**Tissue Location**

Expressed in kidney and intestine (PubMed:8967342). In kidney expressed in the proximal tubule (at protein level) (PubMed:27927654).

**SLC13A2 Antibody (N-term) Blocking peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.
