

CBR3 Antibody (C-term) Blocking peptide Synthetic peptide Catalog # BP12881b

Specification

CBR3 Antibody (C-term) Blocking peptide - Product Information

Primary Accession

<u>075828</u>

CBR3 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 874

Other Names Carbonyl reductase [NADPH] 3, NADPH-dependent carbonyl reductase 3, CBR3

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CBR3 Antibody (C-term) Blocking peptide - Protein Information

Name CBR3 (HGNC:1549)

Function

Catalyzes the NADPH-dependent reduction of carbonyl compounds to their corresponding alcohols (PubMed:18493841). Has low NADPH- dependent oxidoreductase activity. Acts on several orthoquinones, acts as well on non-quinone compounds, such as isatin or on the anticancer drug oracin (PubMed:18493841, PubMed:19841672). Best substrates for CBR3 is 1,2- naphthoquinone, hence could play a role in protection against cytotoxicity of exogenous quinones (PubMed:19841672). Exerts activity toward ortho-quinones but not paraquinones. No endogenous substrate for CBR3 except isatin has been identified (PubMed:19841672).

Cellular Location Cytoplasm.

Tissue Location Detected in ovary, pancreas, intestine, colon, kidney, brain, thymus, lung, heart, liver, spleen,

leukocyte, prostate and testis.

CBR3 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CBR3 Antibody (C-term) Blocking peptide - Background

Carbonyl reductase 3 catalyzes the reduction of a largenumber of biologically and pharmacologically active carbonylcompounds to their corresponding alcohols. The enzyme isclassified as a monomeric NADPH-dependent oxidoreductase. CBR3contains three exons spanning 11.2 kilobases and is closely linkedto another carbonyl reductase gene - CBR1.
