

CATSPER1 Antibody (N-term) Blocking peptide
Synthetic peptide
Catalog # BP12995a

Specification

CATSPER1 Antibody (N-term) Blocking peptide - Product Information

Primary Accession [Q8NEC5](#)

CATSPER1 Antibody (N-term) Blocking peptide - Additional Information

Gene ID 117144

Other Names

Cation channel sperm-associated protein 1, CatSper1, hCatSper, CATSPER1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CATSPER1 Antibody (N-term) Blocking peptide - Protein Information

Name CATSPER1

Function

Voltage-gated calcium channel that plays a central role in calcium-dependent physiological responses essential for successful fertilization, such as sperm hyperactivation, acrosome reaction and chemotaxis towards the oocyte.

Cellular Location

Cell projection, cilium, flagellum membrane; Multi-pass membrane protein {ECO:0000250|UniProtKB:Q91ZR5}. Note=Specifically located in the principal piece of the sperm tail.

Tissue Location

Testis-specific.

CATSPER1 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CATSPER1 Antibody (N-term) Blocking peptide - Background

Calcium ions play a primary role in the regulation of sperm motility. This gene belongs to a family of putative cation channels that are specific to spermatozoa and localize to the flagellum. The protein family features a single repeat with six membrane-spanning segments and a predicted calcium-selective pore region.
