

ARHGAP22 Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP13013b**Specification**

ARHGAP22 Antibody (C-term) Blocking peptide - Product InformationPrimary Accession [Q7Z5H3](#)**ARHGAP22 Antibody (C-term) Blocking peptide - Additional Information****Gene ID** 58504**Other Names**

Rho GTPase-activating protein 22, Rho-type GTPase-activating protein 22, ARHGAP22, RHOGAP2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ARHGAP22 Antibody (C-term) Blocking peptide - Protein Information**Name** ARHGAP22**Synonyms** RHOGAP2**Function**

Rho GTPase-activating protein involved in the signal transduction pathway that regulates endothelial cell capillary tube formation during angiogenesis. Acts as a GTPase activator for the RAC1 by converting it to an inactive GDP-bound state. Inhibits RAC1- dependent lamellipodia formation. May also play a role in transcription regulation via its interaction with VEZF1, by regulating activity of the endothelin-1 (EDN1) promoter (By similarity).

Cellular Location

Cytoplasm. Nucleus. Note=Mainly cytoplasmic. Some fraction is nuclear (By similarity)

ARHGAP22 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

ARHGAP22 Antibody (C-term) Blocking peptide - Images**ARHGAP22 Antibody (C-term) Blocking peptide - Background**

ARHGAPs, such as ARHGAP22, encode negative regulators of Rho GTPases (see ARHA; MIM 165390), which are implicated in actin remodeling, cell polarity, and cell migration (Katoh and Katoh, 2004 [PubMed 15254788]).
