GP2 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [P55259](#)**GP2 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 2813**Other Names**

Pancreatic secretory granule membrane major glycoprotein GP2, Pancreatic zymogen granule membrane protein GP-2, ZAP75, GP2

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13123a was selected from the N-term region of GP2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GP2 Antibody (N-term) Blocking Peptide - Protein Information**Name** GP2 ([HGNC:4441](#))**Function**

Functions as an intestinal M-cell transcytotic receptor specific for type-I-piliated bacteria that participates in the mucosal immune response toward these bacteria. At the apical membrane of M-cells it binds fimH, a protein of the bacteria type I pilus tip. Internalizes bound bacteria, like E.coli and S.typhimurium, from the lumen of the intestine and delivers them, through M-cells, to the underlying organized lymphoid follicles where they are captured by antigen-presenting dendritic cells to elicit a mucosal immune response.

Note=Secreted, after cleavage, in the pancreatic juice.

Tissue Location

Expressed in pancreas (at protein level) (PubMed:8666297, PubMed:10760606). Specifically expressed by M (microfold) cells which are atypical epithelial cells of the intestine (at protein level) (PubMed:19907495).
