

CNTLN Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP13167a**Specification**

CNTLN Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [Q9NXG0](#)**CNTLN Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 54875**Other Names**

Centlein, Centrosomal protein, CNTLN, C9orf101, C9orf39

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13167a was selected from the N-term region of CNTLN. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CNTLN Antibody (N-term) Blocking Peptide - Protein Information**Name** CNTLN**Synonyms** C9orf101, C9orf39**Function**

Required for centrosome cohesion and recruitment of CEP68 to centrosomes.

Cellular Location

Cytoplasm, cytoskeleton, microtubule organizing center, centrosome, centriole Note=Colocalizes with gamma-tubulin during interphase and mitosis Appears to associate with the mother centriole during G1 phase and with daughter centrioles towards G1/S phase (By similarity). Localizes to the proximal ends of the centrioles (PubMed:24554434). Levels are high at interphase centrosomes but are reduced on mitotic spindle poles (PubMed:24554434). {ECO:0000250|UniProtKB:A9ZSY0, ECO:0000269|PubMed:24554434}

CNTLN Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
