

PCDH9 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP13185b**Specification**

PCDH9 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [Q9HC56](#)**PCDH9 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 5101**Other Names**

Protocadherin-9, PCDH9

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13185b was selected from the C-term region of PCDH9. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PCDH9 Antibody (C-term) Blocking Peptide - Protein Information**Name** PCDH9**Function**

Potential calcium-dependent cell-adhesion protein.

Cellular Location

Cell membrane; Single-pass type I membrane protein

PCDH9 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PCDH9 Antibody (C-term) Blocking Peptide - Background

This gene belongs to the protocadherin gene family, a subfamily of the cadherin superfamily. The mRNA encodes a cadherin-related neuronal receptor that localizes to synaptic junctions and is putatively involved in specific neuronal connections and signal transduction. Sharing a characteristic with other protocadherin genes, this gene has a notably large exon that encodes six cadherin domains and a transmembrane region. Two alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.
