

# OR6K6 Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP13262b

#### Specification

## **OR6K6 Antibody (C-term) Blocking peptide - Product Information**

Primary Accession

<u>Q8NGW6</u>

### **OR6K6** Antibody (C-term) Blocking peptide - Additional Information

Gene ID 128371

Other Names Olfactory receptor 6K6, Olfactory receptor OR1-21, OR6K6

#### Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13262b was selected from the C-term region of OR6K6. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

#### Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage** Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

## **Precautions** This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# **OR6K6 Antibody (C-term) Blocking peptide - Protein Information**

Name OR6K6

Function Odorant receptor.

Cellular Location Cell membrane; Multi-pass membrane protein.

# OR6K6 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### **OR6K6 Antibody (C-term) Blocking peptide - Background**

Olfactory receptors interact with odorant molecules in thenose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a largefamily of G-protein-coupled receptors (GPCR) arising from singlecoding-exon genes. Olfactory receptors share a 7-transmembranedomain structure with many neurotransmitter and hormone receptorsand are responsible for the recognition and G protein-mediatedtransduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to theolfactory receptor genes and proteins for this organism isindependent of other organisms.
