

TRIM13 Antibody (N-term) Blocking peptide Synthetic peptide Catalog # BP13285a

Specification

TRIM13 Antibody (N-term) Blocking peptide - Product Information

Primary Accession

<u>060858</u>

TRIM13 Antibody (N-term) Blocking peptide - Additional Information

Gene ID 10206

Other Names

E3 ubiquitin-protein ligase TRIM13, 632-, B-cell chronic lymphocytic leukemia tumor suppressor Leu5, Leukemia-associated protein 5, Putative tumor suppressor RFP2, RING finger protein 77, Ret finger protein 2, Tripartite motif-containing protein 13, TRIM13, LEU5, RFP2, RNF77

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13285a was selected from the N-term region of TRIM13. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TRIM13 Antibody (N-term) Blocking peptide - Protein Information

Name TRIM13

Synonyms LEU5, RFP2, RNF77

Function

Endoplasmic reticulum (ER) membrane anchored E3 ligase involved in the retrotranslocation and turnover of membrane and secretory proteins from the ER through a set of processes named ER-associated degradation (ERAD). This process acts on misfolded proteins as well as in the regulated degradation of correctly folded proteins. Enhances ionizing radiation-induced p53/TP53 stability and apoptosis via ubiquitinating MDM2 and AKT1 and decreasing AKT1 kinase activity through MDM2 and AKT1 proteasomal degradation. Regulates ER stress- induced autophagy, and may act as a tumor suppressor (PubMed:>22178386). Also plays a role in innate immune response by stimulating NF-kappa-B activity in the TLR2 signaling pathway. Ubiquitinates TRAF6 via the 'Lys-29'-linked

polyubiquitination chain resulting in NF-kappa-B activation (PubMed:28087809). Participates as well in T-cell receptor- mediated NF-kappa-B activation (PubMed:25088585). In the presence of TNF, modulates the IKK complex by regulating IKBKG/NEMO ubiquitination leading to the repression of NF-kappa-B (PubMed:25152375).

Cellular Location

Endoplasmic reticulum membrane; Single-pass membrane protein Note=Concentrates and colocalizes with p62/SQSTM1 and ZFYVE1 at the perinuclear endoplasmic reticulum

TRIM13 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

TRIM13 Antibody (N-term) Blocking peptide - Background

This gene encodes a member of the tripartite motif (TRIM)family. The TRIM motif includes three zinc-binding domains, a RING, a B-box type 1 and a B-box type 2, and a coiled-coil region. Thisgene is located on chromosome 13 within the minimal deletion regionfor B-cell chronic lymphocytic leukemia. Multiple alternativelyspliced transcript variants have been found for this gene.
