

CD7 Antibody (Center) Blocking peptide
Synthetic peptide
Catalog # BP13714c**Specification**

CD7 Antibody (Center) Blocking peptide - Product InformationPrimary Accession [P09564](#)**CD7 Antibody (Center) Blocking peptide - Additional Information****Gene ID** 924**Other Names**

T-cell antigen CD7, GP40, T-cell leukemia antigen, T-cell surface antigen Leu-9, TP41, CD7, CD7

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13714c was selected from the Center region of CD7. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CD7 Antibody (Center) Blocking peptide - Protein Information**Name** CD7**Function**

Not yet known.

Cellular Location

Membrane; Single-pass type I membrane protein.

CD7 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CD7 Antibody (Center) Blocking peptide - Background

This gene encodes a transmembrane protein which is a member of the immunoglobulin superfamily. This protein is found on thymocytes and mature T cells. It plays an essential role in T-cell interactions and also in T-cell/B-cell interaction during early lymphoid development.
