

# TUBB2A Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP13739b

### **Specification**

### TUBB2A Antibody (C-term) Blocking peptide - Product Information

Primary Accession

013885

# TUBB2A Antibody (C-term) Blocking peptide - Additional Information

**Gene ID 7280** 

#### **Other Names**

Tubulin beta-2A chain, Tubulin beta class IIa, TUBB2A, TUBB2

### Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13739b was selected from the C-term region of TUBB2A. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## TUBB2A Antibody (C-term) Blocking peptide - Protein Information

#### Name TUBB2A

**Synonyms** TUBB2

## **Function**

Tubulin is the major constituent of microtubules, a cylinder consisting of laterally associated linear protofilaments composed of alpha- and beta-tubulin heterodimers. Microtubules grow by the addition of GTP-tubulin dimers to the microtubule end, where a stabilizing cap forms. Below the cap, tubulin dimers are in GDP-bound state, owing to GTPase activity of alpha-tubulin.

#### **Cellular Location**

Cytoplasm, cytoskeleton.

### **Tissue Location**

High expression in brain, where it represents 30% of all beta-tubulins.

# TUBB2A Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

# • Blocking Peptides

TUBB2A Antibody (C-term) Blocking peptide - Images

### TUBB2A Antibody (C-term) Blocking peptide - Background

Tubulin is the major constituent of microtubules. It binds two moles of GTP, one at an exchangeable site on the beta chain and one at a non-exchangeable site on the alpha-chain (By similarity).
