

PNPLA4 Antibody (C-term) Blocking peptide Synthetic peptide Catalog # BP13971b

Specification

PNPLA4 Antibody (C-term) Blocking peptide - Product Information

Primary Accession

<u>P41247</u>

PNPLA4 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 8228

Other Names Patatin-like phospholipase domain-containing protein 4, Protein GS2, PNPLA4, DXS1283E, GS2

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13971b was selected from the C-term region of PNPLA4. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PNPLA4 Antibody (C-term) Blocking peptide - Protein Information

Name PNPLA4 (HGNC:24887)

Function

Has abundant triacylglycerol lipase activity (PubMed:15364929, PubMed:16150821, PubMed:17603008). Transfers fatty acid from triglyceride to retinol, hydrolyzes retinylesters, and generates 1,3-diacylglycerol from triglycerides (PubMed:17603008" target="_blank">17603008). Additionally possesses acylglycerol transacylase and phospholipase A2 activities (PubMed:15364929, PubMed:17603008). Transfers fatty acid from triglyceride to retinol, hydrolyzes retinylesters, and generates 1,3-diacylglycerol from triglycerides (PubMed:17603008). Additionally possesses acylglycerol transacylase and phospholipase A2 activities (PubMed:15364929, PubMed:15364929).

Cellular Location Mitochondrion.

Tissue Location

Expressed in all tissues examined, including heart, brain, placenta, lung, liver, muscle, kidney, pancreas and spleen

PNPLA4 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PNPLA4 Antibody (C-term) Blocking peptide - Background

This gene encodes a member of the patatin-like family ofphospholipases. The encoded enzyme has both triacylglycerol lipaseand transacylase activities and may be involved in adipocytetriglyceride homeostasis. Alternate splicing results in multipletranscript variants. A pseudogene of this gene is found onchromosome Y.
