

NRTN Antibody (Center) Blocking peptide
Synthetic peptide
Catalog # BP14055c**Specification**

NRTN Antibody (Center) Blocking peptide - Product InformationPrimary Accession [Q99748](#)**NRTN Antibody (Center) Blocking peptide - Additional Information****Gene ID** 4902**Other Names**

Neurturin, NRTN

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP14055c was selected from the Center region of NRTN. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

NRTN Antibody (Center) Blocking peptide - Protein Information**Name** NRTN**Function**

Supports the survival of sympathetic neurons in culture. May regulate the development and maintenance of the CNS. Might control the size of non-neuronal cell population such as haemopoietic cells.

Cellular Location

Secreted.

NRTN Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

NRTN Antibody (Center) Blocking peptide - Images**NRTN Antibody (Center) Blocking peptide - Background**

Neurturin is a member of the TGF-beta subfamily, TRN. This gene signals through RET and a GPI-linked coreceptor, and promotes survival of neuronal populations. A neurturin mutation has been described in a family with Hirschsprung Disease. [provided by RefSeq].
