

C9orf98 Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP14079b**Specification**

C9orf98 Antibody (C-term) Blocking peptide - Product InformationPrimary Accession [Q96MA6](#)**C9orf98 Antibody (C-term) Blocking peptide - Additional Information****Gene ID** 158067**Other Names**

Adenylate kinase 8, AK 8, ATP-AMP transphosphorylase 8, AK8, C9orf98

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP14079b was selected from the C-term region of C9orf98. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

C9orf98 Antibody (C-term) Blocking peptide - Protein Information**Name** AK8**Synonyms** C9orf98**Function**

Nucleoside monophosphate (NMP) kinase that catalyzes the reversible transfer of the terminal phosphate group between nucleoside triphosphates and monophosphates. Has highest activity toward AMP, and weaker activity toward dAMP, CMP and dCMP. Also displays broad nucleoside diphosphate kinase activity.

Cellular Location

Cytoplasm, cytosol. Cytoplasm, cytoskeleton, cilium axoneme Note=Located in the proximal region of respiratory cilia

Tissue Location

Expressed in respiratory cells (at protein level).

C9orf98 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
