

CIR Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP1417b**Specification**

CIR Antibody (C-term) Blocking Peptide - Product Information

Primary Accession [Q86X95](#)

CIR Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 9541

Other Names

Corepressor interacting with RBPJ 1, CBF1-interacting corepressor, Receptin, CIR1, CIR

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP1417b](/product/products/AP1417b) was selected from the C-term region of human CIR. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CIR Antibody (C-term) Blocking Peptide - Protein Information

Name CIR1

Synonyms CIR

Function

May modulate splice site selection during alternative splicing of pre-mRNAs (By similarity). Regulates transcription and acts as corepressor for RBPJ. Recruits RBPJ to the Sin3-histone deacetylase complex (HDAC). Required for RBPJ-mediated repression of transcription.

Cellular Location

Nucleus speckle. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome. Note=Colocalizes with NEK6 in the centrosome

Tissue Location

Highly expressed in heart, brain, placenta, liver, skeletal muscle and pancreas.

CIR Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CIR Antibody (C-term) Blocking Peptide - Background

CIR may modulate splice site selection during alternative splicing of pre-mRNAs. It regulates transcription and acts as corepressor for RBPSUH. It recruits RBPSUH to the Sin3-histone deacetylase complex (HDAC), and is required for RBPSUH-mediated repression of transcription.
