

MAS1 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP14230b**Specification**

MAS1 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [P04201](#)**MAS1 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 4142**Other Names**

Proto-oncogene Mas, MAS1, MAS

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MAS1 Antibody (C-term) Blocking Peptide - Protein Information**Name** MAS1**Synonyms** MAS**Function**

Receptor for angiotensin 1-7 (By similarity). Acts specifically as a functional antagonist of AGTR1 (angiotensin-2 type 1 receptor), although it up-regulates AGTR1 receptor levels. Positive regulation of AGTR1 levels occurs through activation of the G-proteins GNA11 and GNAQ, and stimulation of the protein kinase C signaling cascade. The antagonist effect on AGTR1 function is probably due to AGTR1 being physically altered by MAS1.

Cellular Location

Cell membrane; Multi-pass membrane protein

MAS1 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

MAS1 Antibody (C-term) Blocking Peptide - Images**MAS1 Antibody (C-term) Blocking Peptide - Background**

The structure of the MAS1 product indicates that it belongs to the class of receptors that are coupled to GTP-binding proteins and share a conserved structural motif, which is described as a '7-transmembrane segment' following the prediction that these hydrophobic segments form membrane-spanning alpha-helices. The MAS1 protein may be a receptor that, when activated, modulates a critical component in a growth-regulating pathway to bring about oncogenic effects.
