

CDH7 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP1471b**Specification**

CDH7 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession [Q9ULB5](#)

CDH7 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 1005

Other Names

Cadherin-7, CDH7, CDH7L1

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP1471b](/product/products/AP1471b) was selected from the C-term region of human CDH7. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CDH7 Antibody (C-term) Blocking Peptide - Protein Information

Name CDH7

Synonyms CDH7L1

Function

Cadherins are calcium-dependent cell adhesion proteins. They preferentially interact with themselves in a homophilic manner in connecting cells; cadherins may thus contribute to the sorting of heterogeneous cell types.

Cellular Location

Cell membrane; Single-pass type I membrane protein

CDH7 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CDH7 Antibody (C-term) Blocking Peptide - Background

CDH7 is a type II classical cadherin from the cadherin superfamily. This protein is a calcium dependent cell-cell adhesion glycoprotein comprised of five extracellular cadherin repeats, a transmembrane region and a highly conserved cytoplasmic tail. Type II (atypical) cadherins are defined based on their lack of a HAV cell adhesion recognition sequence specific to type I cadherins. Cadherins mediate cell-cell binding in a homophilic manner, contributing to the sorting of heterogeneous cell types and the maintenance of orderly structures.
