

**CREG1 Antibody (N-term) Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP14997a****Specification**

---

**CREG1 Antibody (N-term) Blocking Peptide - Product Information**Primary Accession [O75629](#)**CREG1 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 8804**Other Names**

Protein CREG1, Cellular repressor of E1A-stimulated genes 1, CREG1, CREG

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**CREG1 Antibody (N-term) Blocking Peptide - Protein Information****Name** CREG1**Synonyms** CREG**Function**

May contribute to the transcriptional control of cell growth and differentiation. Antagonizes transcriptional activation and cellular transformation by the adenovirus E1A protein. The transcriptional control activity of cell growth requires interaction with IGF2R.

**Cellular Location**

Secreted.

**CREG1 Antibody (N-term) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**CREG1 Antibody (N-term) Blocking Peptide - Background**

The adenovirus E1A protein both activates and represses gene expression to promote cellular proliferation and inhibit differentiation. The protein encoded by this gene antagonizes transcriptional activation and cellular transformation by E1A. This protein shares limited sequence similarity with E1A and binds both the general transcription factor TBP and the tumor suppressor pRb in vitro. This gene may contribute to the transcriptional control of cell growth and differentiation.
