

CHRD Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP16028c**Specification**

CHRD Antibody (Center) Blocking Peptide - Product Information

Primary Accession [Q9H2X0](#)

CHRD Antibody (Center) Blocking Peptide - Additional Information

Gene ID 8646

Other Names
Chordin, CHRD

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CHRD Antibody (Center) Blocking Peptide - Protein Information

Name CHRD

Function

Dorsalizing factor. Key developmental protein that dorsalizes early vertebrate embryonic tissues by binding to ventralizing TGF-beta family bone morphogenetic proteins (BMPs) and sequestering them in latent complexes (By similarity).

Cellular Location

Secreted.

Tissue Location

Expressed at the highest level in liver.

CHRD Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CHRD Antibody (Center) Blocking Peptide - Background

This gene encodes a secreted protein that dorsalizes early vertebrate embryonic tissues by binding to ventralizing TGF-beta-like bone morphogenetic proteins and sequestering them in latent complexes. The encoded protein may also have roles in organogenesis and during adulthood. Multiple transcript variants encoding distinct isoforms have been identified for this gene. Other alternative splice variants have been described but their full length sequence has not been determined.
