

KLF9 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP16249a**Specification**

KLF9 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [Q13886](#)**KLF9 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 687**Other Names**

Krueppel-like factor 9, Basic transcription element-binding protein 1, BTE-binding protein 1, GC-box-binding protein 1, Transcription factor BTEB1, KLF9, BTEB, BTEB1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

KLF9 Antibody (N-term) Blocking Peptide - Protein Information**Name** KLF9**Synonyms** BTEB, BTEB1**Function**

Transcription factor that binds to GC box promoter elements. Selectively activates mRNA synthesis from genes containing tandem repeats of GC boxes but represses genes with a single GC box. Acts as an epidermal circadian transcription factor regulating keratinocyte proliferation (PubMed:22711835).

Cellular Location

Nucleus.

Tissue Location

Epidermis (at protein level).

KLF9 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

KLF9 Antibody (N-term) Blocking Peptide - Background

The protein encoded by this gene is a transcription factor that binds to GC box elements located in the promoter. Binding of the encoded protein to a single GC box inhibits mRNA expression while binding to tandemly repeated GC box elements activates transcription.
