

RGS8 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP16415a

Specification

RGS8 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

P57771

RGS8 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 85397

Other Names

Regulator of G-protein signaling 8, RGS8, RGS8

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

RGS8 Antibody (N-term) Blocking Peptide - Protein Information

Name RGS8

Function

Regulates G protein-coupled receptor signaling cascades, including signaling via muscarinic acetylcholine receptor CHRM2 and dopamine receptor DRD2 (By similarity). Inhibits signal transduction by increasing the GTPase activity of G protein alpha subunits, thereby driving them into their inactive GDP-bound form (PubMed:18434541). Modulates the activity of potassium channels that are activated in response to DRD2 and CHRM2 signaling (By similarity).

Cellular Location

Cell membrane {ECO:0000250|UniProtKB:P49804}; Peripheral membrane protein {ECO:0000250|UniProtKB:P49804}; Cytoplasmic side {ECO:0000250|UniProtKB:P49804}. Membrane {ECO:0000250|UniProtKB:P49804}; Peripheral membrane protein {ECO:0000250|UniProtKB:P49804}; Cytoplasmic side {ECO:0000250|UniProtKB:P49804}. Perikaryon {ECO:0000250|UniProtKB:P49804}. Cell projection, dendrite {ECO:0000250|UniProtKB:P49804}. Nucleus {ECO:0000250|UniProtKB:P49804} Note=Detected in Purkinje cell soma and dendrites. Associated with Purkinje cell membranes. Not detected in Purkinje cell nuclei. Detected in the nucleus after heterologous expression. Recruited to the cell membrane in the presence of GNAO1. {ECO:0000250|UniProtKB:P49804}

RGS8 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

RGS8 Antibody (N-term) Blocking Peptide - Background

RGS8 is a member of the regulator of G proteinsignaling (RGS) family and encodes a protein with a single RGSdomain. Regulator of G protein signaling (RGS) proteins are regulatory and structural components of G protein-coupled receptorcomplexes. They accelerate transit through the cycle of GTP bindingand hydrolysis to GDP, thereby terminating signal transduction, butparadoxically, also accelerate receptor-stimulated activation.
