

MRPS15 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP16498c**Specification**

MRPS15 Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [P82914](#)**MRPS15 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 64960**Other Names**

28S ribosomal protein S15, mitochondrial, MRP-S15, S15mt, MRPS15, RPMS15

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MRPS15 Antibody (Center) Blocking Peptide - Protein Information**Name** MRPS15**Synonyms** RPMS15**Cellular Location**

Mitochondrion matrix

MRPS15 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA composition.

compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitochondria and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitochondrion differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 28S subunit protein that belongs to the ribosomal protein S15P family. The encoded protein is more than two times the size of its E. coli counterpart, with the 12S rRNA binding sites conserved. Between human and mouse, the encoded protein is the least conserved among small subunit ribosomal proteins. Pseudogenes corresponding to this gene are found on chromosomes 15q and 19q.
