

TNNT2 Antibody (Center) Blocking Peptide

Synthetic peptide Catalog # BP16580c

Specification

TNNT2 Antibody (Center) Blocking Peptide - Product Information

Primary Accession

P45379

TNNT2 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 7139

Other Names

Troponin T, cardiac muscle, TnTc, Cardiac muscle troponin T, cTnT, TNNT2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TNNT2 Antibody (Center) Blocking Peptide - Protein Information

Name TNNT2

Function

Troponin T is the tropomyosin-binding subunit of troponin, the thin filament regulatory complex which confers calcium-sensitivity to striated muscle actomyosin ATPase activity.

Tissue Location

Heart. The fetal heart shows a greater expression in the atrium than in the ventricle, while the adult heart shows a greater expression in the ventricle than in the atrium. Isoform 6 predominates in normal adult heart. Isoforms 1, 7 and 8 are expressed in fetal heart. Isoform 7 is also expressed in failing adult heart

TNNT2 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

TNNT2 Antibody (Center) Blocking Peptide - Background

The protein encoded by this gene is thetropomyosin-binding subunit of the troponin complex, which islocated on the thin filament of striated muscles and regulatesmuscle contraction in response to alterations in intracellularcalcium ion concentration. Mutations in this gene have been associated with familial hypertrophic cardiomyopathy as well aswith dilated cardiomyopathy. Transcripts for this gene undergoalternative splicing that results in many tissue-specific isoforms, however, the full-length nature of some of these variants has notyet been determined.
