

Catalog # BP16581b

MMP9 Antibody (C-term) Blocking Peptide Synthetic peptide

### Specification

## MMP9 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

<u>P14780</u>

### MMP9 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 4318

**Other Names** 

Matrix metalloproteinase-9, MMP-9, 92 kDa gelatinase, 92 kDa type IV collagenase, Gelatinase B, GELB, 67 kDa matrix metalloproteinase-9, 82 kDa matrix metalloproteinase-9, MMP9, CLG4B

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage** Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions** This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### MMP9 Antibody (C-term) Blocking Peptide - Protein Information

Name MMP9

Synonyms CLG4B

#### Function

Matrix metalloproteinase that plays an essential role in local proteolysis of the extracellular matrix and in leukocyte migration (PubMed:<a href="http://www.uniprot.org/citations/2551898" target="\_blank">2551898</a>, PubMed:<a href="http://www.uniprot.org/citations/1480034" target="\_blank">1480034</a>, PubMed:<a href="http://www.uniprot.org/citations/12879005" target="\_blank">12879005</a>). Could play a role in bone osteoclastic resorption (By similarity). Cleaves KiSS1 at a Gly-|-Leu bond (PubMed:<a href="http://www.uniprot.org/citations/12879005" target="\_blank">12879005</a>). Cleaves NINJ1 to generate the Secreted ninjurin-1 form (PubMed:<a href="http://www.uniprot.org/citations/32883094" target="\_blank">32883094</a>). Cleaves type IV and type V collagen into large C-terminal three quarter fragments and shorter Nterminal one quarter fragments (PubMed:<a href="http://www.uniprot.org/citations/1480034" target="\_blank">1480034</a>). Degrades fibronectin but not laminin or Pz-peptide.

**Cellular Location** 

Secreted, extracellular space, extracellular matrix

### **Tissue Location**

Detected in neutrophils (at protein level) (PubMed:7683678). Produced by normal alveolar macrophages and granulocytes.

# MMP9 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

<u>Blocking Peptides</u>

## MMP9 Antibody (C-term) Blocking Peptide - Background

Proteins of the matrix metalloproteinase (MMP) family areinvolved in the breakdown of extracellular matrix in normalphysiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in diseaseprocesses, such as arthritis and metastasis. Most MMP's aresecreted as inactive proproteins which are activated when cleavedby extracellular proteinases. The enzyme encoded by this genedegrades type IV and V collagens. Studies in rhesus monkeys suggestthat the enzyme is involved in IL-8-induced mobilization ofhematopoietic progenitor cells from bone marrow, and murine studiessuggest a role in tumor-associated tissue remodeling. [provided byRefSeq].
