IFFO2 Antibody (C-term) Blocking Peptide

Synthetic peptide
Catalog # BP16608b

Specification

IFFO2 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession Q5TF58

IFFO2 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 126917

Other Names
Intermediate filament family orphan 2, IFFO2

Format
Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions
This product is for research use only. Not for use in diagnostic or therapeutic procedures.

IFFO2 Antibody (C-term) Blocking Peptide - Protein Information

Name IFFO2

IFFO2 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Blocking Peptides

IFFO2 Antibody (C-term) Blocking Peptide - Background

IFFO2 (intermediate filament family orphan 2) is 517 amino acid protein that is encoded by a gene mapping to human chromosome 1p36.13 and mouse chromosome 4 D3. Human chromosome 1 spans 260 million base pairs, contains over 3,000 genes and comprises nearly 8% of the human genome. Chromosome 1 houses a large number of disease-associated genes, including those that are involved in familial adenomatous polyposis, Stickler syndrome, Parkinson□s disease, Gaucher disease, schizophrenia and Usher syndrome. Aberrations in chromosome 1 are found in a variety of cancers, including head and neck cancer, malignant melanoma and multiple myeloma.
