

CRYGN Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP16910b**Specification**

CRYGN Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [Q8WXF5](#)**CRYGN Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 155051**Other Names**

Gamma-crystallin N, Gamma-N-crystallin, CRYGN

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CRYGN Antibody (C-term) Blocking Peptide - Protein Information**Name** CRYGN ([HGNC:20458](#))**Tissue Location**

Not specifically expressed in eye.

CRYGN Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CRYGN Antibody (C-term) Blocking Peptide - Images**CRYGN Antibody (C-term) Blocking Peptide - Background**

The beta and gamma crystallins are evolutionarily related families of proteins that are localized to the refractive structure of the eye lens. The protein encoded by this gene is unique in that it has both beta and gamma crystallin protein motifs. [provided by RefSeq].
