

MRP63 Antibody (Center) Blocking Peptide

Synthetic peptide Catalog # BP16939c

Specification

MRP63 Antibody (Center) Blocking Peptide - Product Information

Primary Accession

<u>Q9BQC6</u>

MRP63 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 78988

Other Names

Ribosomal protein 63, mitochondrial, hMRP63, Mitochondrial ribosomal protein 63, Mitochondrial ribosomal protein L57, MRPL57, MRP63

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MRP63 Antibody (Center) Blocking Peptide - Protein Information

Name MRPL57

Synonyms MRP63

Cellular Location Mitochondrion

MRP63 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

MRP63 Antibody (Center) Blocking Peptide - Background

Mammalian mitochondrial ribosomal proteins are encoded bynuclear genes and help in protein synthesis within themitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of asmall 285

subunit and a large 39S subunit. They have an estimated75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalianmitoribosomes and prokaryotic ribosomes is that the latter containa 5S rRNA. Among different species, the proteins comprising themitoribosome differ greatly in sequence, and sometimes inbiochemical properties, which prevents easy recognition by sequencehomology. This gene encodes a protein which belongs to anundetermined ribosomal subunit and which seems to be specific toanimal mitoribosomes. Pseudogenes corresponding to this gene arefound on chromosomes 1p, 1q, 3p, 5q, 8q, 14q, and Y. [provided byRefSeq].
