

ANP32B Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP17005a**Specification**

ANP32B Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [Q92688](#)**ANP32B Antibody (N-term) Blocking Peptide - Additional Information**

Gene ID 10541

Other Names

Acidic leucine-rich nuclear phosphoprotein 32 family member B, Acidic protein rich in leucines, Putative HLA-DR-associated protein I-2, PHAPI2, Silver-stainable protein SSP29, ANP32B, APRIL, PHAPI2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ANP32B Antibody (N-term) Blocking Peptide - Protein Information

Name ANP32B

Synonyms APRIL, PHAPI2

Function

Multifunctional protein that is involved in the regulation of many processes including cell proliferation, apoptosis, cell cycle progression or transcription (PubMed: [20015864](http://www.uniprot.org/citations/20015864), PubMed: [18039846](http://www.uniprot.org/citations/18039846)). Regulates the proliferation of neuronal stem cells, differentiation of leukemic cells and progression from G1 to S phase of the cell cycle. As negative regulator of caspase-3-dependent apoptosis, may act as an antagonist of ANP32A in regulating tissue homeostasis (PubMed: [20015864](http://www.uniprot.org/citations/20015864)). Exhibits histone chaperone properties, able to recruit histones to certain promoters, thus regulating the transcription of specific genes (PubMed: [20538007](http://www.uniprot.org/citations/20538007), PubMed: [18039846](http://www.uniprot.org/citations/18039846)). Also plays an essential role in the nucleocytoplasmic transport of specific mRNAs via the uncommon nuclear mRNA export receptor XPO1/CRM1 (PubMed: [17178712](http://www.uniprot.org/citations/17178712)). Participates

in the regulation of adequate adaptive immune responses by acting on mRNA expression and cell proliferation (By similarity).

Cellular Location

[Isoform 1]: Nucleus. Cytoplasm Note=Accumulates in the nuclei at the S phase.

Tissue Location

Expressed in heart, lung, pancreas, prostate and in spleen, thymus and placenta.

ANP32B Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Blocking Peptides](#)

ANP32B Antibody (N-term) Blocking Peptide - Images**ANP32B Antibody (N-term) Blocking Peptide - Background**

Multifunctional protein working as a cell cycle progression factor as well as a cell survival factor. Required for the progression from the G1 to the S phase. Anti-apoptotic protein which functions as a caspase-3 inhibitor. Has no phosphatase 2A (PP2A) inhibitor activity (By similarity).
