**MMRN1 Antibody (N-term) Blocking Peptide - Product Information**Primary Accession [O13201](#)**MMRN1 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 22915**Other Names**

Multimerin-1, EMILIN-4, Elastin microfibril interface located protein 4, Elastin microfibril interfacer 4, Endothelial cell multimerin, Platelet glycoprotein Ia\*, 155 kDa platelet multimerin, p-155, p155, MMRN1, ECM, EMILIN4, GPIA\*, MMRN

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**MMRN1 Antibody (N-term) Blocking Peptide - Protein Information****Name** MMRN1**Synonyms** ECM, EMILIN4, GPIA\*, MMRN**Function**

Carrier protein for platelet (but not plasma) factor V/Va. Plays a role in the storage and stabilization of factor V in platelets. Upon release following platelet activation, may limit platelet and plasma factor Va-dependent thrombin generation. Ligand for integrin alpha-IIb/beta-3 and integrin alpha-V/beta-3 on activated platelets, and may function as an extracellular matrix or adhesive protein.

**Cellular Location**

Secreted.

**Tissue Location**

Synthesized by endothelial cells and megakaryocytes. Stored in platelet alpha granules and endothelial cell Weibel-Palade bodies, following activation of these cells, it is released and attached to megakaryocytes, platelets, endothelium and subendothelium of blood vessels. Not found in plasma. Found in vascular tissues such as placenta, lung, and liver.

### **MMRN1 Antibody (N-term) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

### **MMRN1 Antibody (N-term) Blocking Peptide - Background**

Multimerin is a massive, soluble protein found in platelets and in the endothelium of blood vessels. It is comprised of subunits linked by interchain disulfide bonds to form large, variably sized homomultimers. Multimerin is a factor V/Va-binding protein and may function as a carrier protein for platelet factor V. It may also have functions as an extracellular matrix or adhesive protein. Recently, patients with an unusual autosomal-dominant bleeding disorder (factor V Quebec) were found to have a deficiency of platelet multimerin.
