

# **CREBZF Antibody (C-term) Blocking Peptide**

Synthetic peptide Catalog # BP17569b

### **Specification**

### **CREBZF Antibody (C-term) Blocking Peptide - Product Information**

Primary Accession

**Q9NS37** 

## CREBZF Antibody (C-term) Blocking Peptide - Additional Information

**Gene ID 58487** 

#### **Other Names**

CREB/ATF bZIP transcription factor, Host cell factor-binding transcription factor Zhangfei, HCF-binding transcription factor Zhangfei, CREBZF, ZF

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### CREBZF Antibody (C-term) Blocking Peptide - Protein Information

Name CREBZF

Synonyms ZF

#### **Function**

Strongly activates transcription when bound to HCFC1. Suppresses the expression of HSV proteins in cells infected with the virus in a HCFC1-dependent manner. Also suppresses the HCFC1-dependent transcriptional activation by CREB3 and reduces the amount of CREB3 in the cell. Able to down-regulate expression of some cellular genes in CREBZF-expressing cells.

#### **Cellular Location**

Nucleus. Note=Colocalizes in promyelocytic leukemia protein nuclear bodies (PML- NB) with CREB3 and HCFC1

#### **Tissue Location**

In adults, expressed most abundantly in heart, liver and skeletal muscle, moderately abundant in kidney and pancreas, and barely detectable in lung. In fetal tissues, expressed most abundantly in kidney and very low amounts in heart, lung and liver

### CREBZF Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
