

# OR4C6 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP17769a

# Specification

# OR4C6 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

#### <u>Q8NH72</u>

# **OR4C6 Antibody (N-term) Blocking Peptide - Additional Information**

Gene ID 219432

**Other Names** Olfactory receptor 4C6, Olfactory receptor OR11-138, OR4C6

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### **Storage** Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions** This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# **OR4C6 Antibody (N-term) Blocking Peptide - Protein Information**

Name OR4C6

Function Odorant receptor.

**Cellular Location** Cell membrane; Multi-pass membrane protein.

# **OR4C6 Antibody (N-term) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

# OR4C6 Antibody (N-term) Blocking Peptide - Background

Olfactory receptors interact with odorant molecules in thenose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a largefamily of

G-protein-coupled receptors (GPCR) arising from singlecoding-exon genes. Olfactory receptors share a 7-transmembranedomain structure with many neurotransmitter and hormone receptorsand are responsible for the recognition and G protein-mediatedtransduction of odorant signals. The olfactory receptor gene familyis the largest in the genome. The nomenclature assigned to theolfactory receptor genes and proteins for this organism isindependent of other organisms.
