

ANAPC4 Antibody (Center) Blocking Peptide

Synthetic peptide Catalog # BP17878c

Specification

ANAPC4 Antibody (Center) Blocking Peptide - Product Information

Primary Accession

<u>Q9UJX5</u>

ANAPC4 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 29945

Other Names Anaphase-promoting complex subunit 4, APC4, Cyclosome subunit 4, ANAPC4, APC4

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ANAPC4 Antibody (Center) Blocking Peptide - Protein Information

Name ANAPC4

Synonyms APC4

Function

Component of the anaphase promoting complex/cyclosome (APC/C), a cell cycle-regulated E3 ubiquitin ligase that controls progression through mitosis and the G1 phase of the cell cycle. The APC/C complex acts by mediating ubiquitination and subsequent degradation of target proteins: it mainly mediates the formation of 'Lys-11'-linked polyubiquitin chains and, to a lower extent, the formation of 'Lys-48'- and 'Lys-63'-linked polyubiquitin chains.

Cellular Location Nucleus.

ANAPC4 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

ANAPC4 Antibody (Center) Blocking Peptide - Background

A large protein complex, termed the anaphase-promotingcomplex (APC), or the cyclosome, promotes metaphase-anaphasetransition by ubiquitinating its specific substrates such asmitotic cyclins and anaphase inhibitor, which are subsequentlydegraded by the 26S proteasome. Biochemical studies have shown thatthe vertebrate APC contains eight subunits. The composition of theAPC is highly conserved in organisms from yeast to humans. Theexact function of this gene product is not known. [provided byRefSeq].
