

LHFP Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP18018a**Specification**

LHFP Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [Q9Y693](#)**LHFP Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 10186**Other Names**

Lipoma HMGIC fusion partner, LHFP

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

LHFP Antibody (N-term) Blocking Peptide - Protein Information**Name** LHFPL6 ([HGNC:6586](#))**Cellular Location**

Membrane; Multi-pass membrane protein

Tissue Location

Pancreas, kidney, skeletal muscle, liver, lung brain, heart, colon, small intestine, uterus, testis, prostate, thymus, spleen and placenta.

LHFP Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

LHFP Antibody (N-term) Blocking Peptide - Images**LHFP Antibody (N-term) Blocking Peptide - Background**

This gene is a member of the lipoma HMGIC fusion partner(LHFP) gene family, which is a subset of

the superfamily of tetraspan transmembrane protein encoding genes. This gene is fused to a high-mobility group gene in a translocation-associated lipoma. Mutations in another LHFP-like gene result in deafness in humans and mice. Alternatively spliced transcript variants have been found; however, their full-length nature is not known. [provided by RefSeq].
