

MTL5 Antibody (C-term) Blocking Peptide

Synthetic peptide Catalog # BP18102b

Specification

MTL5 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

09Y4I5

MTL5 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 9633

Other Names

Tesmin, Metallothionein-like 5, testis-specific, Testis-specific metallothionein-like protein, MTL5

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MTL5 Antibody (C-term) Blocking Peptide - Protein Information

Name TESMIN (HGNC:7446)

Synonyms MTL5

Function

Essential for normal spermatogenesis and male fertility (By similarity). Required for the completion of meiosis in male germ cells (By similarity).

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:Q9WTJ6}. Nucleus {ECO:0000250|UniProtKB:Q9WTJ6}. Note=Predominantly localized to the cytoplasm. Translocates from the cytoplasm to the nucleus in the G2/M transition upon treatment with cadmium, cobalt or zinc {ECO:0000250|UniProtKB:Q9WTJ6}

Tissue Location

Expressed specifically in testis.

MTL5 Antibody (C-term) Blocking Peptide - Background

Metallothionein proteins are highly conservedlow-molecular-weight cysteine-rich proteins that are induced by andbind to heavy metal ions and have no enzymatic activity. They mayplay a central role in the regulation of cell growth and differentiation and are involved in spermatogenesis. This geneencodes a metallothionein-like protein which has been shown to beexpressed differentially in mouse testis and ovary. Two transcriptvariants encoding different isoforms have been found for this gene.
