

# **AFF2 Antibody (Center) Blocking Peptide**

Synthetic peptide Catalog # BP18150c

### **Specification**

## AFF2 Antibody (Center) Blocking Peptide - Product Information

**Primary Accession** 

P51816

## AFF2 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 2334

#### **Other Names**

AF4/FMR2 family member 2, Fragile X E mental retardation syndrome protein, Fragile X mental retardation 2 protein, FMR2P, Protein FMR-2, Protein Ox19, AFF2, FMR2, OX19

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### AFF2 Antibody (Center) Blocking Peptide - Protein Information

Name AFF2 (HGNC:3776)

Synonyms FMR2, OX19

#### **Function**

RNA-binding protein. Might be involved in alternative splicing regulation through an interaction with G-quartet RNA structure.

### **Cellular Location**

Nucleus speckle. Note=When splicing is inhibited, accumulates in enlarged speckles

#### **Tissue Location**

Brain (most abundant in hippocampus and amygdala), placenta and lung

## **AFF2 Antibody (Center) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

# AFF2 Antibody (Center) Blocking Peptide - Background

This gene encodes a putative transcriptional activatorthat is a member of the AF4FMR2 gene family. This gene isassociated with the folate-sensitive fragile X E locus onchromosome X. A repeat polymorphism in the fragile X E locusresults in silencing of this gene causing Fragile X E syndrome. Fragile X E syndrome is a form of nonsyndromic X-linked mentalretardation. Alternate splicing results in multiple transcriptvariants.
