

TFG Antibody (Center) Blocking Peptide Synthetic peptide Catalog # BP18173c

Specification

TFG Antibody (Center) Blocking Peptide - Product Information

Primary Accession

<u>Q92734</u>

TFG Antibody (Center) Blocking Peptide - Additional Information

Gene ID 10342

Other Names Protein TFG, TRK-fused gene protein, TFG

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TFG Antibody (Center) Blocking Peptide - Protein Information

Name TFG

Function

Plays a role in the normal dynamic function of the endoplasmic reticulum (ER) and its associated microtubules (PubMed:23479643, PubMed:27813252). Required for secretory cargo traffic from the endoplasmic reticulum to the Golgi apparatus (PubMed:21478858).

Cellular Location

Endoplasmic reticulum. Note=Localizes to endoplasmic reticulum exit site (ERES), also known as transitional endoplasmic reticulum (tER) (PubMed:27813252, PubMed:21478858).

Tissue Location Ubiquitous.

TFG Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

TFG Antibody (Center) Blocking Peptide - Background

There are several documented fusion oncoproteins encodedpartially by this gene. This gene also participates in severaloncogenic rearrangements resulting in anaplastic lymphoma andmixoid chondrosarcoma, and may play a role in the NF-kappaBpathway. Multiple transcript variants have been found for thisgene.
