

## IRG1 Antibody (Center) Blocking Peptide

Synthetic peptide Catalog # BP18784c

### **Specification**

## IRG1 Antibody (Center) Blocking Peptide - Product Information

**Primary Accession** 

**A6NK06** 

# IRG1 Antibody (Center) Blocking Peptide - Additional Information

**Gene ID** 730249

#### **Other Names**

Cis-aconitate decarboxylase, CAD, Aconitate decarboxylase, Cis-aconitic acid decarboxylase, Immune-responsive gene 1 protein, IRG1

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### IRG1 Antibody (Center) Blocking Peptide - Protein Information

Name ACOD1 (HGNC:33904)

### **Function**

Cis-aconitate decarboxylase that catalyzes production of itaconate and is involved in the inhibition of the inflammatory response (PubMed: <a href="http://www.uniprot.org/citations/23609450" target=" blank">23609450</a>, PubMed:<a href="http://www.uniprot.org/citations/23610393" target=" blank">23610393</a>, PubMed:<a href="http://www.uniprot.org/citations/31548418" target="blank">31548418</a>, PubMed:<a href="http://www.uniprot.org/citations/35662396" target=" blank">35662396</a>). Acts as a negative regulator of the Toll-like receptors (TLRs)-mediated inflammatory innate response by stimulating the tumor necrosis factor alpha-induced protein TNFAIP3 expression via reactive oxygen species (ROS) in LPS-tolerized macrophages (PubMed:<a href="http://www.uniprot.org/citations/23609450" target=" blank">23609450</a>). Involved in antimicrobial response of innate immune cells; ACOD1-mediated itaconic acid production contributes to the antimicrobial activity of macrophages by generating itaconate, leading to alkylation of proteins, such as TFEB (PubMed:<a href="http://www.uniprot.org/citations/23610393" target="\_blank">23610393</a>, PubMed:<a href="http://www.uniprot.org/citations/35662396" target="blank">35662396</a>). Involved in antiviral response following infection by flavivirus in neurons: ACOD1-mediated itaconate production inhibits the activity of succinate dehydrogenase, generating a metabolic state in neurons that suppresses replication of viral genomes (By similarity). Plays a role in the embryo

implantation (By similarity).

### **Cellular Location**

Mitochondrion {ECO:0000250|UniProtKB:P54987}.

### **Tissue Location**

Expressed in LPS-tolerized macrophages (at protein level). Expressed in peripheral blood mononuclear cells (PBMCs), microglia and macrophage cells.

# IRG1 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
